Dear Jemal

Have you ever failed to have one of your proposals receiving european funding?

You are not the only one!

Do you know how much money are wasted in Europe in submitting proposals that request european funding but eventually fail?
It is not close at any number that you are thinking!

Do you want also to know the recipe on how to develop a great proposal for receiving european funds?

As a professional funding expert the last 19 years and EC evaluator and expert since 2003, I have come up with the complete recipe for creating a great "meal/proposal". Check out my new free video that will give you answers to those two questions and make you realise what it takes in order to become a successful funding expert, service your organisation and to your clients with european funding and have a financial freedom and improve your lifestyle. The recipe is not too complicated. In fact, it is common sense but apparently, it is not common practice for the majority of european funding applicants.

Click the image below or this [link](#) (if image not visible) to access instantly for FREE my 50' video and blog that I talk about the recipe

Enjoy it and keep on learning for becoming a funding expert with value
